

Dovetail Drawer Box

All solid wood drawer boxes are priced by the lineal inch plus a labor charge. To price a drawer box, add up the circumference of the box and multiply that number by the specie charge. That charge can be found in the chart across the page. To calculate the correct pricing, select the specie needed and then follow it over to the correct height column. The number there is the multiplier that needs to be used in the price calculation. After multiplying those numbers, add the correct labor charge, based upon the height of the box; add to that amount any option charges required (notching, scoops, tabs, etc.) and that will give the drawer box total. Multiply that number by your trade discount and that will give the cost of the box. If you are not familiar with your trade discount, contact your Customer Service Representative.

Example:

Specie: SC Beech with Beech Bottoms

Drawer Size: 20" Wide X 22" Deep X 8" High

Drawer Options: Notch and Bore for Eclipse® Slides, include the brackets

Lineal Inches: 84

84 Lineal Inches X \$.xx =	\$ x.xx	Material Cost
	+ \$ x.xx	Labor Charge
	\$ x.xx	Drawer Cost
2-Notch and Bore	+ \$ x.xx	
2-Eclipse® Brackets	+ \$ x.xx	
Total:	\$xx.xx	◀ The total is subject to your trade discount.
