Panel Options: **Slab Only**

**Style 441**  
Price Group: 1  
Panel Options: **Slab Only**  
Grain Direction: **Horizontal**

*Because of the potential of a solid slab door to warp, twist or cup, Westwind guarantees only the 442 style. The 442 includes saw kerfs cut into half of the thickness of the slab on the back face, 2¼" on center and 2¼" from each edge. This reduces the slabs ability to warp and twist. The kerf ends are covered with ½" x 2¼" battens to give the slab a finished look. The battens are screwed two inches away from the slab edges.*

Product	Price Group	Treatment	Thickness of Part
GU	2	Rough	.9375"
GU38	3	180 Grit Face and Back	.375"
GU12	3	180 Grit Face and Back	.500"
GU58	3	180 Grit Face and Back	.625"
GU34	3	180 Grit Face and Back	.750"
RP38	4	180 Grit Face and Back	.375"
RP12	4	180 Grit Face and Back	.500"
RP58	4	180 Grit Face and Back	.625"
440	5	Vibrate Face and Back	.780"
442	6	Vibrate Face and Back	.780"
441	1	Vibrate Face	.780"

GU's and RP's are available with a saw cut edge only.

All slabs over 12 total square feet or over 32" wide is subject to an \$x.xx per square foot up-charge.

440s thru 442s are available with any edge shown on our edge profile page. (Pages 14-16)

Minimum square footage for pricing: GUs and RPs is 0.5 square feet. 440 & 442 is 1.5 square feet and 441 is 1 square foot.

Any profiled slab ordered with one dimension less than 3", is subject to a \$xx.xx up-charge.
